

SVS 610CC

SVS 610CC is designed for the Clearfield® production system. This hybrid is consistent amongst all soil types. Late grain fill period maximizes top end yield potential.

Agronomic Traits

- IMI herbicide tolerance
- DMR tolerance
- Consistent across soil types
- Drought tolerance
- Large head shape
- Excellent center head fill
- Half turned head position

Characteristics

Maturity Medium/Full
 Seed colorBlack
 Sunflower typeOil
 Oil typeLinoleic
 Average oil content50–52
 Days to flower68
 Days to relative maturity109
 Average height68-72 inches

Agronomic Rating	1	3	5	7	9
Leaf Rust					
Phomopsis					
Downey Mildew					
Stalk Quality					
Root Quality					
Self-Compatibility					

Scale 1 to 9: 9=Highly Resistant, 1=Highly Susceptible

Notes
